

POLY-MVA

5 IMPORTANT REASONS WHY YOU NEED POLY MVA

We all have energy gaps for one reason or another and research has made it clear that everyone can benefit from supplementation like Poly MVA. Once you understand why, we know you'll be motivated to add this to your daily healthy habits.

The great news is that simply adding as little as ½ teaspoon of Poly MVA to your daily routine is one of the easiest ways to support energy production and help you feel your best

On to those 5 important reasons why you need Poly MVA.

1) The Standard American diet – Imbalanced and mostly processed, modern day foods are stripped of nutrients and most likely you will not be able to receive the vitamins, minerals and amino acids that are needed for energy production. This can lead to a diet and lifestyle that are highly inflammatory which can further contribute to individuals that are energy and nutrient deficient or otherwise known as sluggish and out of gas.

2) Environmental Exposures - We live in the most toxic environment the world has ever seen. Toxins can be found in cleaning products, plastic water bottles, personal care products, mercury dental fillings, and that's just to name a few. You need an additional boost of vitamins, minerals, and antioxidants just to help your body support the needed energy/ATP to help remove those chemicals and maintain optimal performance.

POLY-MVA

3) Modern living equals constant STRESS - Today's fast-paced, 24-hour hectic lifestyle taxes our adrenals, which impacts our hormones and ultimately plays a part in energy production. As a result, we need even more energy to adapt and overcome these deficits. Unique supplementation with Poly MVA can help support the needs for energy production.

4) Anti-Aging - What is AGING? At the heart of this question is one simple thing... Mitochondria, and less of them. The breakdown of cells, less muscle mass, along with growth and recovery factors, can contribute to decade after decade of cellular degeneration, aka aging. Give yourself the Poly MVA support that is needed in support against advanced aging.

5) Daily Support - Just like maintaining our car or our home, these require regular cleanings and maintenance. Our bodies are no different and Poly-MVA is the powerful nutraceutical that can be used and given to support all of us, regardless of our age or degree of wellness.

To sum it all up:

People take Poly-MVA for optimum health and maximum nutritional support. Poly is designed to support energy which can reduce occasional fatigue, and provide nutritional support for those who may have nutrients depleted.
